Vo Đinh Quoc Bao

Web Developer

Phone: (+84) 372 783 767
Email: quocbao201104@gmail.com
Website: https://baodev.indevs.in/
Github: https://github.com/quocbao201104
Address: Tan Binh Dist, Ho Chi Minh City

OBJECTIVE

Short-term: Backend Developer Intern / Fresher Node.js, focusing on building secure, high-performance RESTful APIs with Node.js and MySQL.
Long-term: Pursue in-depth Backend development, aiming to design scalable and secure systems.

EDUCATION

2022 - Present

Van Hien University

Major: Information Technology

Specialization: Information Security

WORK EXPERIENCE

7/2025 - Present

PERSONAL PROJECT: ONLINE WEB NOVEL SYSTEM

TruyenVietHay – Backend Developer

- Built the system using Layered Architecture (Node.js, Express) to handle complex business logic: multi-level novel approval workflow and Gamification system (EXP, Ranking).
- Implemented authentication with JWT (Access/Refresh Token) and RBAC authorization, ensuring data safety and preventing common application vulnerabilities.
- Designed Schema and optimized MySQL (Raw Query) on the Aiven platform, ensuring high query performance for interactive features: reading history, following, and comments.
- Integrated Cloudinary API to manage and optimize images (resize, CDN), helping to increase page load speed.
